Story 1

Task 2	Task 3	Task 4	Task 5.1	Task 5.2	Task 6.1	Task 6.2
--------	--------	--------	----------	----------	----------	----------

Task 1

Write down the names of the top three states where NO₂ pollution is consistently high for three consecutive months.

The state where NO₂ pollution appears consistently high for three consecutive months are:

- A) New York
- B) Massachusetts
- C) District of Columbia

These states show higher average NO₂ level in all the charts for January, February, and March.

Task 2

Which state has the highest number of the most polluted cities?

California has the highest number of the most polluted cities.

- Burbank
- Bakersfield
- Los Angeles

(and others from California are listed with high pollutant levels, including NO₂ and CO.)

Task 3

Identify and write down the top two cities with the highest pollution.

- The top two cities with the highest pollution levels are:

- A.) Bakersfield - with an Avg. CO Mean of 0.825968 and an Avg. NO₂ Mean of 32.559.
- B.) Burbank - with an Avg. CO Mean of 0.816351 and an Avg. NO₂ Mean of 28.988.

Task 4

Write down the name of the pollutant whose measure is consistently high for each city.

- A.) NO₂ (Nitrogen Dioxide) levels are consistently higher in comparison to the other pollutants for both Bakersfield and Burbank.
- B.) The average NO₂ values are 28.988 and 32.559.
